

Accessibility Audit Report

Document: **InterviewingSkillGuideFinal (2).pdf**
Date: June 18, 2026
Standards: WCAG 2.1 Level AA • ADA Title II • Section 508 • EN 301 549
Methodology: multi-pass AI self-consistency review + axe-core (Deque) automated verification
Tool: AlloFlow Document Accessibility Pipeline

Scores varied significantly (range: 32, SD: 11.3) across 7 audits. While the document is well-tagged with semantic lists and a logical reading order, it contains critical accessibility failures including a near-total absence of alternative text for complex diagrams and missing document-level metadata.

Cross-Pass Agreement Metrics

AI passes: 7 | Individual scores: 11, 28, 16, 31, 43, 36, 21 | SEM: ±4.3 | Range: 32 | Reliability: good

Document Properties

CRITICAL (22) Critical Issues (Before Remediation)

Issue	WCAG	Count
Alt text is missing for 56 of the 57 figure elements, leaving complex educational diagrams and university logos inaccessible to screen reader users.	1.1.1	56

Issue	WCAG	Count
The document lacks a primary language identifier, preventing screen readers from automatically selecting the correct voice profile.	3.1.1	
The PDF metadata lacks a document title, which is required for users to identify the file contents without opening it.	2.4.2	
There is no 'Main' landmark or region defined in the tag tree to allow assistive technology to navigate directly to the primary content.	1.3.1	
Fifty-six Figure tags lack descriptive alternative text to explain the visual diagrams and logos.	1.1.1	56
The document's root tag tree does not specify a primary language attribute for screen reader synthesis.	3.1.1	
The PDF metadata does not contain a document title, causing the filename to be read by assistive technologies instead.	2.4.2	
Fifty-six figure elements throughout the document are missing alternative text descriptions for visual content.	1.1.1	56
The document lacks a specified natural language attribute in its metadata.	3.1.1	
The document is missing a descriptive page title in the file metadata.	2.4.2	
The tag tree does not include a main landmark role to identify the primary content of the document.	1.3.1	
The document lacks a primary language attribute in the metadata to identify the content as English for screen readers.	3.1.1	
The PDF does not have a descriptive document title defined in its metadata properties.	2.4.2	
Fifty-six figures and instructional diagrams throughout the document lack alternative text to describe their visual information.	1.1.1	56
The document contains 56 figure tags that lack alternative text, rendering visual content inaccessible to screen reader users.	1.1.1	56
The document metadata does not include a page title, which is required for users to identify the document content in window tabs and screen reader lists.	2.4.2	
The document metadata lacks a descriptive page title which is necessary for identification in browser tabs and screen readers.	2.4.2	

Issue	WCAG	Count
Fifty-six figure elements within the tag tree are missing alternative text descriptions for visual content.	1.1.1	56
The document contains 56 figure elements that lack descriptive alternative text to convey visual information to screen reader users.	1.1.1	56
The PDF fails to specify a document language in its metadata, which prevents assistive technologies from loading the correct voice profile.	3.1.1	
The tag tree lacks a 'Main' landmark role or equivalent structural tag to identify the primary content region for assistive technology users.	1.3.1	
Light blue text used for major headings fails to meet the minimum 3:1 contrast ratio required for large text against a white background.	1.4.3	

SERIOUS (11) **Serious Issues (Before Remediation)**

Issue	WCAG	Count
Data tables describing listening levels and rapport methods lack table header tags and scope attributes, preventing meaningful navigation.	1.3.1	4
Several diagrams use white text on light teal or light blue backgrounds that likely do not meet the minimum contrast ratio of 4.5:1.	1.4.3	6
Data tables on pages 11 through 14 are tagged with data cells only and lack semantic header rows or scope assignments.	1.3.1	4
Light blue text used for headings and within diagram boxes does not meet the minimum 4.5:1 contrast ratio required for accessibility.	1.4.3	25
The data tables on pages 11, 13, and 14 are missing semantic header tags and scope attributes to define relationships.	1.3.1	3
The white text used on light blue and light purple backgrounds in diagrams provides insufficient color contrast.	1.4.3	5
The data tables for listening levels and rapport methods lack semantic table header tags to define column and row relationships.	1.3.1	4
Light blue heading text used for section titles provides insufficient color contrast against the white background.	1.4.3	12
Data tables within the document lack semantic header cells and scope attributes to programmatically associate data with its labels.	1.3.1	4

Issue	WCAG	Count
Data tables throughout the document lack table header cells and scope attributes to associate headers with data.	1.3.1	3
The data tables in the document lack table header tags to programmatically associate header information with corresponding data cells.	1.3.1	3

MODERATE (4) **Moderate Issues (Before Remediation)**

Issue	WCAG	Count
The document lacks a skip-to-content link, requiring keyboard and screen reader users to navigate through repetitive headers on every page.	2.4.1	
The checklists on pages 3 and 15 use visual square characters rather than semantic list structures.	1.3.1	2
The logical structure tree fails to include a main landmark to define the primary content area.	1.3.1	
The document does not provide a mechanism to skip over repetitive navigation or header content to reach the main body of the text.	2.4.1	

MINOR (12) **Minor Issues (Before Remediation)**

Issue	WCAG	Count
The document contains 37 H1 elements, many of which are used for stylistic title page lines rather than marking unique top-level sections.	1.3.1	37
The file is missing descriptive metadata fields including author and subject information.	1.3.1	
The document uses 37 H1 tags throughout the text instead of a properly nested heading hierarchy.	1.3.1	37
The first page uses multiple H1 elements for title and author information rather than a hierarchical structure.	1.3.1	
The document is missing required metadata fields such as the subject and author information in the file properties.	1.3.1	
The document utilizes thirty-seven H1 elements which prevents the establishment of a clear and logical heading hierarchy.	1.3.1	37

Issue	WCAG	Count
The document properties are missing essential metadata fields including author and subject information.	1.3.1	
The document utilizes 37 H1 tags for various text elements rather than a single primary heading followed by subordinate heading levels.	1.3.1	37
The document uses thirty-seven H1 tags which results in an over-fragmented heading structure for users navigating by headings.	1.3.1	37
Document metadata fields for author and subject are not populated within the file properties.	2.4.2	2
The document uses multiple H1 tags on the first page for author names and affiliations instead of reserving it for the primary document title.	1.3.1	
The document metadata does not include a descriptive title or populated author field in the file properties.	2.4.2	

✓ AI Audit — Passing Checks (25)

Checks that passed during the initial AI audit (before remediation)

- ✓ The document contains a searchable text layer throughout all pages.
- ✓ Semantic list structures (LI and LBody) are correctly used for bulleted and numbered content.
- ✓ The reading order is logically maintained through the use of Sect and Part tags.
- ✓ No form fields or descriptive link issues were identified.
- ✓ The document contains a logical structure tree with specific roles for paragraphs, lists, and headings.
- ✓ A searchable text layer is present throughout the document.
- ✓ The document uses semantic LI and LBody tags for several of its bulleted lists.
- ✓ The document contains a logical structure tree with Sect and Part roles.
- ✓ A searchable text layer is present for all content.
- ✓ Lists are semantically tagged with LI and LBody roles.
- ✓ Heading tags (H1, H2, H3) are used to organize the content.
- ✓ The document contains a logical tag tree with proper role assignments for lists and paragraphs.
- ✓ Text is searchable and selectable, confirming a valid OCR or text layer.
- ✓ Content is logically sequenced into parts and sections within the tag tree.
- ✓ The document is fully tagged with a logical structure tree.
- ✓ The document contains a searchable text layer rather than scanned images.
- ✓ Semantic list tags (LI and LBody) are used correctly for bulleted content.
- ✓ Heading hierarchy is present with H1, H2, and H3 roles defined.

- ✓ The document includes a searchable text layer for all content.
- ✓ The document contains a heading hierarchy including H1, H2, and H3 tags.
- ✓ The logical structure tree uses Section and Part roles to organize content.
- ✓ The document is properly tagged with a logical structure tree including sections and parts.
- ✓ Lists are correctly formatted using semantic list tags (LI, LBody).
- ✓ The PDF contains a searchable text layer and is not a scanned image.
- ✓ Heading tags (H1, H3) are present, providing a basic navigable outline.

After Remediation

Results below reflect the document state after automated remediation and any manual edits.

axe-core Automated Verification

Independent automated testing by Deque axe-core engine (industry standard WCAG scanner)

0
VIOLATIONS

25
CHECKS PASSED

100
AXE-CORE SCORE

Zero WCAG violations detected by axe-core

▼ axe-core: 25 Accessibility Checks Passed

Complete list of WCAG rules verified as passing by the axe-core automated scanner

Rule	Description	WCAG	Elements Checked
aria-allowed-attr	Elements must only use supported ARIA attributes	wcag2a, wcag412	20
aria-conditional-attr	ARIA attributes must be used as specified for the element's role	wcag2a, wcag412	20
aria-deprecated-role	Deprecated ARIA roles must not be used	wcag2a, wcag412	1
aria-hidden-body	aria-hidden="true" must not be present on the document body	wcag2a, wcag131, wcag412	1
aria-hidden-focus	ARIA hidden element must not be focusable or contain focusable elements	wcag2a, wcag412	27
aria-prohibited-attr	Elements must only use permitted ARIA attributes	wcag2a, wcag412	19
aria-required-attr	Required ARIA attributes must be provided	wcag2a, wcag412	1
aria-roles	ARIA roles used must conform to valid values	wcag2a, wcag412	1

Rule	Description	WCAG	Elements Checked
aria-valid-attr-value	ARIA attributes must conform to valid values	wcag2a, wcag412	20
aria-valid-attr	ARIA attributes must conform to valid names	wcag2a, wcag412	20
avoid-inline-spacing	Inline text spacing must be adjustable with custom stylesheets	wcag21aa, wcag1412	95
button-name	Buttons must have discernible text	wcag2a, wcag412	18
bypass	Page must have means to bypass repeated blocks	wcag2a, wcag241	1
color-contrast	Elements must meet minimum color contrast ratio thresholds	wcag2aa, wcag143	263
document-title	Documents must have
